

# Booster Seat

- Ideally outgrown the height OR weight limit of their 5-point harness seat

---

- Minimum weight - 40 pounds  
Minimum age - 4 years old

---

- Mature enough to remain seated upright for the remainder of the drive

---

- Lap portion of seatbelt laying low across child's hips

---

- Shoulder portion of vehicle seatbelt laying across the child's collarbone  
(not pressing into their neck, or at the edge of their shoulder)

---

- Seatbelt laying flat against child's body, not hovering in any location

---

- Upper shell of seat no lower than the top of the child's ears (*high back booster only*)

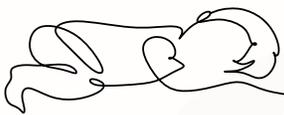

---

- Vehicle headrest behind child's head (*backless booster only*)

---

- UAS anchor points in locked position (if applicable for your seat)

---
