

Infant Seat aka “Bucket Seat”

● Babe dressed in thin layers of clothing

● Baby’s bum in the crease of the seat

● Head at least one inch below the top of the seat

● Shoulder straps arching over shoulder, entering the shell of the seat at or below the level of babe’s shoulders.

● Lower straps coming over hips and connecting in the middle

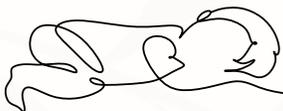

● Chest clip positioned at the level of the armpits, over the chest

● Straps laying flat against babe, not able to pinch and hold a loop of strap at the shoulder

● Carry handle in correct position (follow manufacturers directions)

● Installed at the correct angel in the vehicle (follow leveling guide on seat)

● Installed with the vehicle seatbelt OR the UAS
